Lunches Required:	No
Power Requirements:	One 13 amp plug socket (own RCD provided)

Description of Layout

Based in a small rural area in the East Midlands, Wendsleydale depicts the Industrial side of model railways, with a narrow gauge railway servicing a small quarry and factory area. At an upper level you will be able to view a processing plant manufacturing everyday goods that you may recognise. Look out for the animation of some of the workers and machinery in the quarry and the factory with amusing effect. The village of Wendsleydale is well depicted on the new extension board again with many amusing features.

Other Information for Exhibition Managers:

Layout is viewed from the front, but operated from the right hand side.

Will only do two day shows if within a 50 mile radius of home.
